

ILP
SCALING NEW HEIGHTS

Annual Impact Report

Chairman's message

Manmohan Jain
ILP India Chairman

At the outset, I would like to thank all who have been part of the ILP journey over the years and especially so in the challenging times of the recent past.

While it is evident that we cannot return to the world as it was before, it is worrisome to see the disproportionate impact of the virus on the disadvantaged sections. While technological advancement helps make all humanity interconnected, and aspires to bring a level playing field, the social and economic order have shown the impact of the virus to be disparate and unjust, impacting the marginalized far more deeply than the privileged.

ILP along with other nonprofits, and also educators, policy makers, local governments and communities as a whole have to make deliberate and intelligent high-stake choices that should effectively shape a resilient system to tackle any future disruptions, disruptions that can result in pervasive learning loss in children and livelihood impact in the communities we serve.

While we rejoice and celebrate India's 75th year of Independence and take pride in our advancements in various fields like space, medicine, sports, technology etc., we still have much to catch-up at primary levels when it comes to quality of education. This reiterates the need for innovative hyper-local interventions co-existing with the policy driven systemic initiatives.

COVID-19 has revealed vulnerabilities but has also brought to the fore extraordinary human resourcefulness and potential. Our passionate ILP staff, enthusiastic volunteers, committed partners and generous donors inspire and motivate us to forge ahead while taking cognizance of the new reality to realize a shared dream.

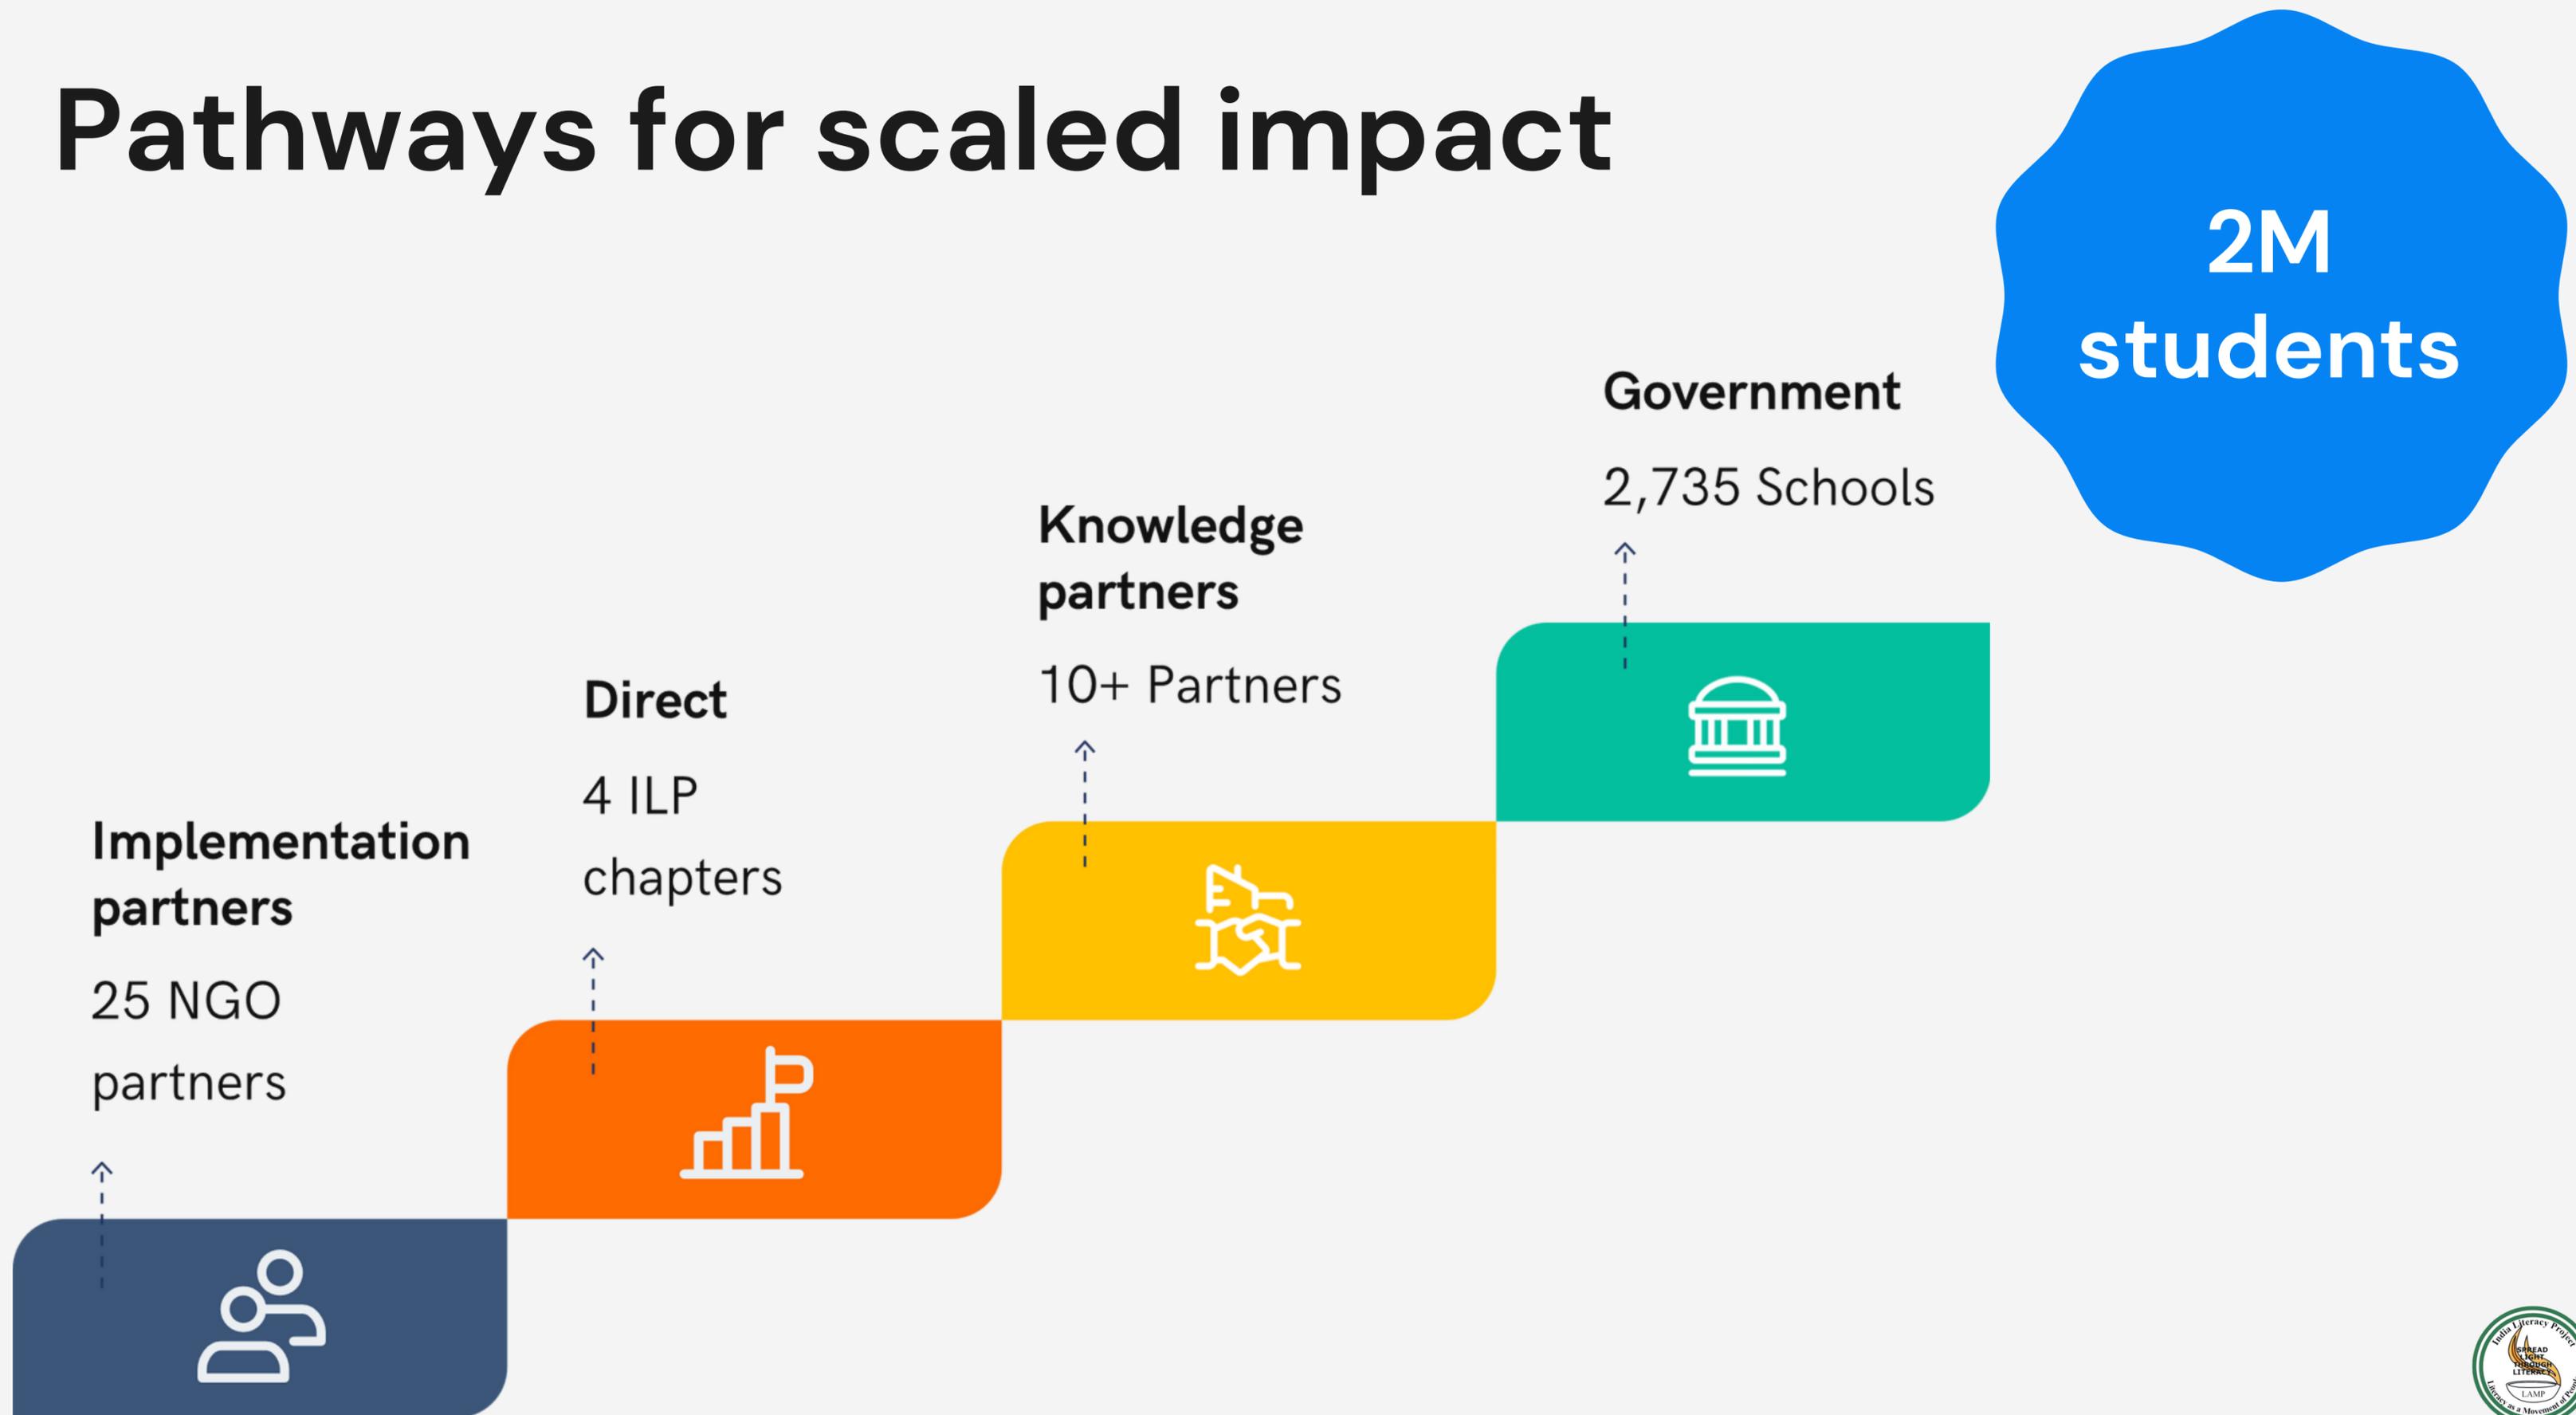

A new reality that in normal course may have happened gradually over five to ten years, got accelerated and compressed and thrust upon all – privileged or not in one year. And the world was forced to adapt. And concomitantly ILP's programs had to instantaneously evolve, innovate and transform. We are happy that our programs are bringing impact in the numerous schools as you will read in the following pages.

Once again, thank you for joining hands with ILP to make an impactful difference.

Best wishes,
ILP Chairman

Pathways for scaled impact

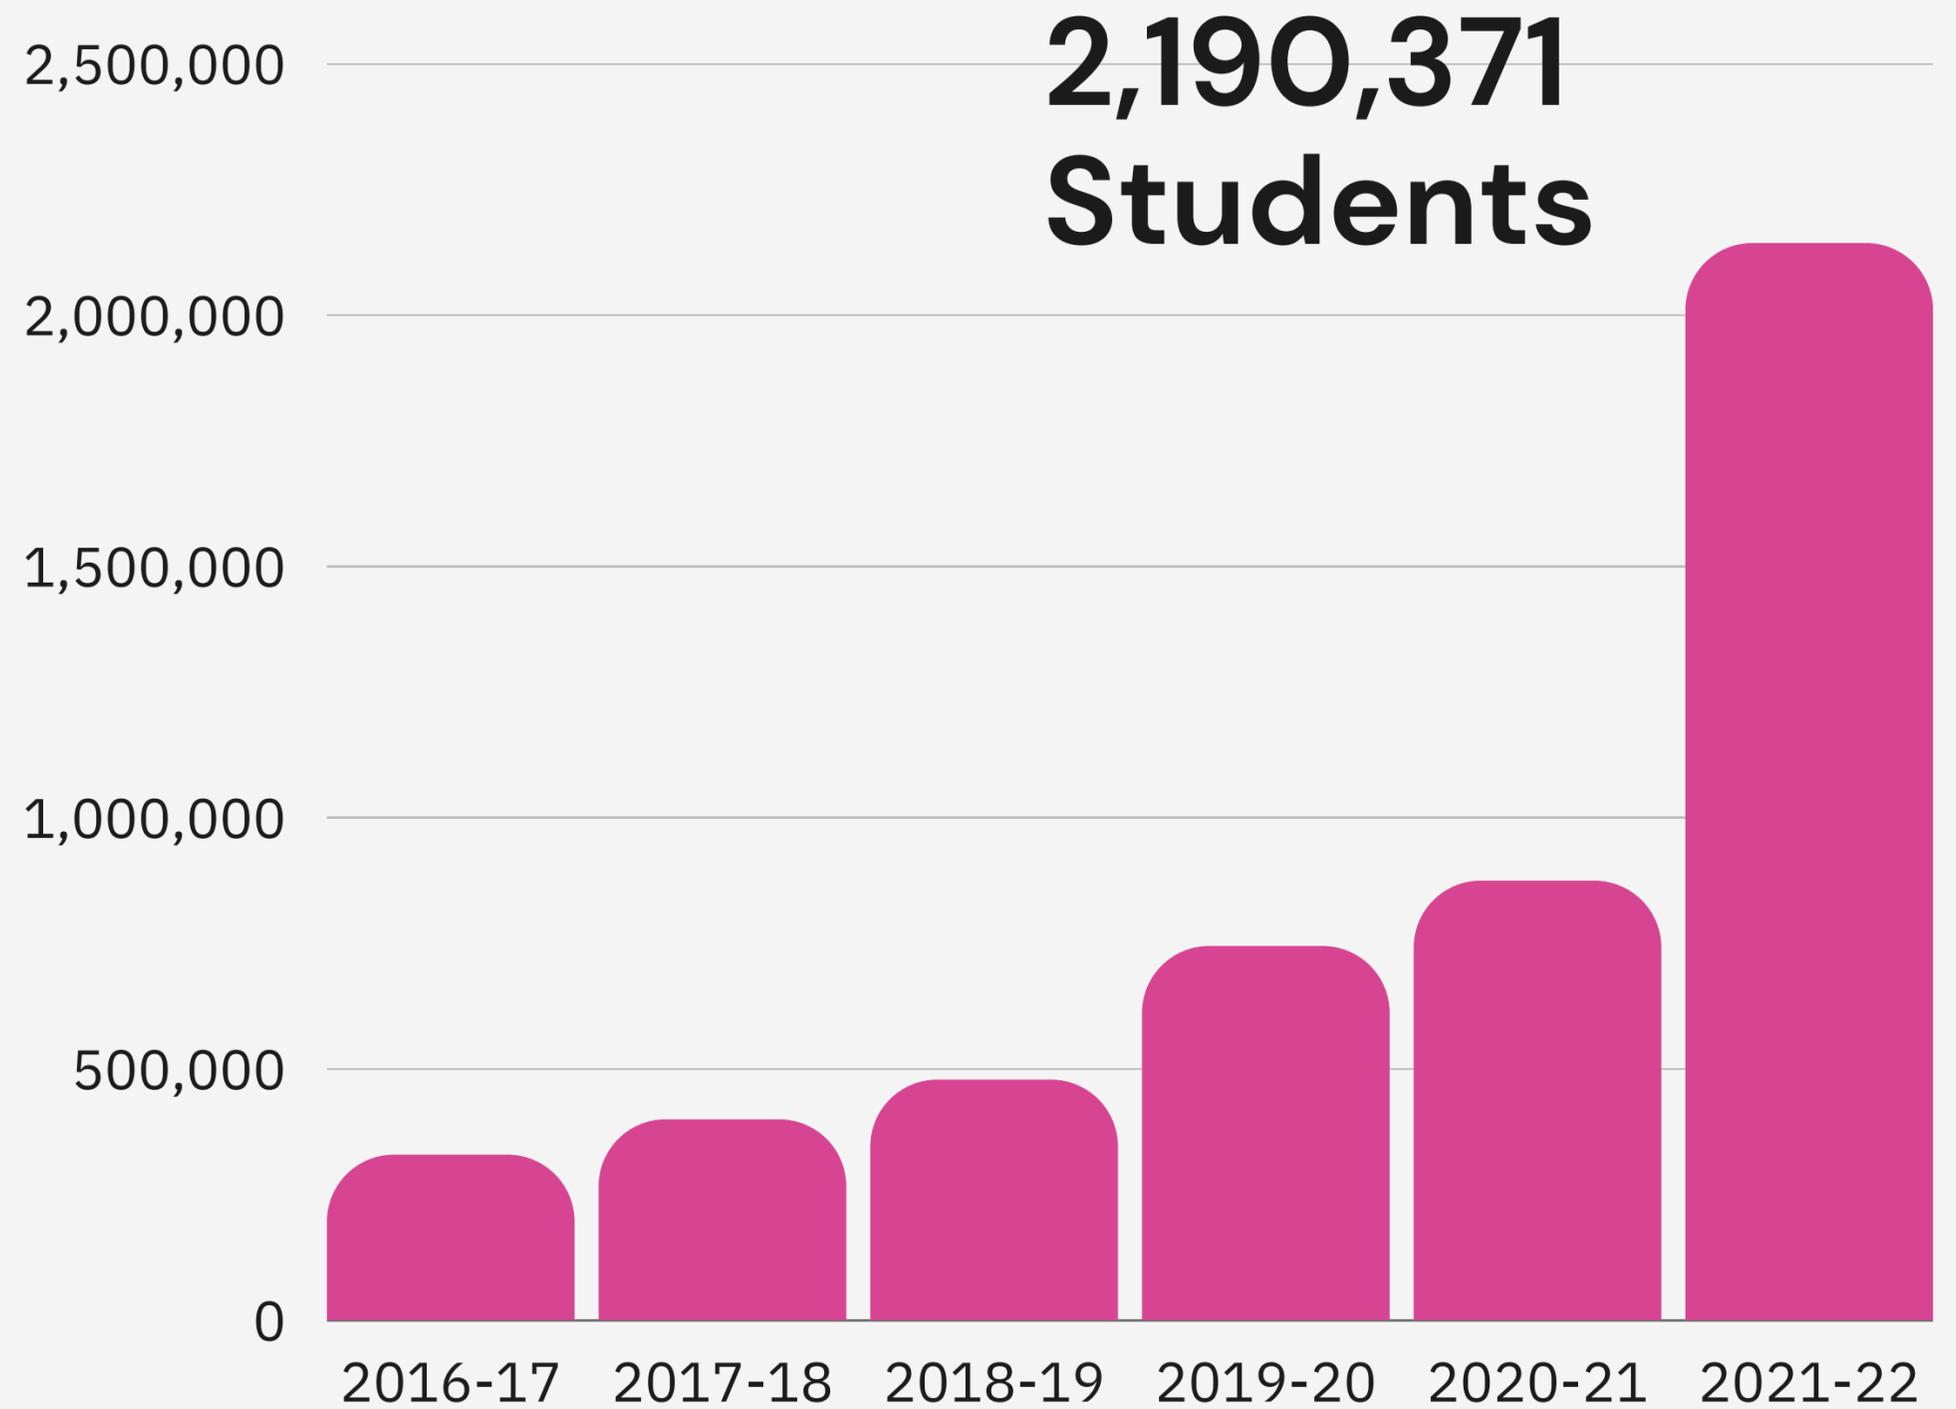

Reach

2021-22 Actuals

7 States

2,805 Villages

**14,825 Preschools &
Schools**

Schooling components

Ensure children are back in school and catching up on learning losses due to COVID

School infrastructure

Building tools
Drinking water

School services

Mid day meals
Textbooks/uniforms

Student participation

Enrollment
Attendance

School governance

PTA
Teacher attendance

**Children unable to focus
in class & low attendance**

**Less than 6 months of
schooling last year**

**Teacher shortages in
many states**

Village Learning Centers (VLC)

57%

of VLCs in Community provided spaces

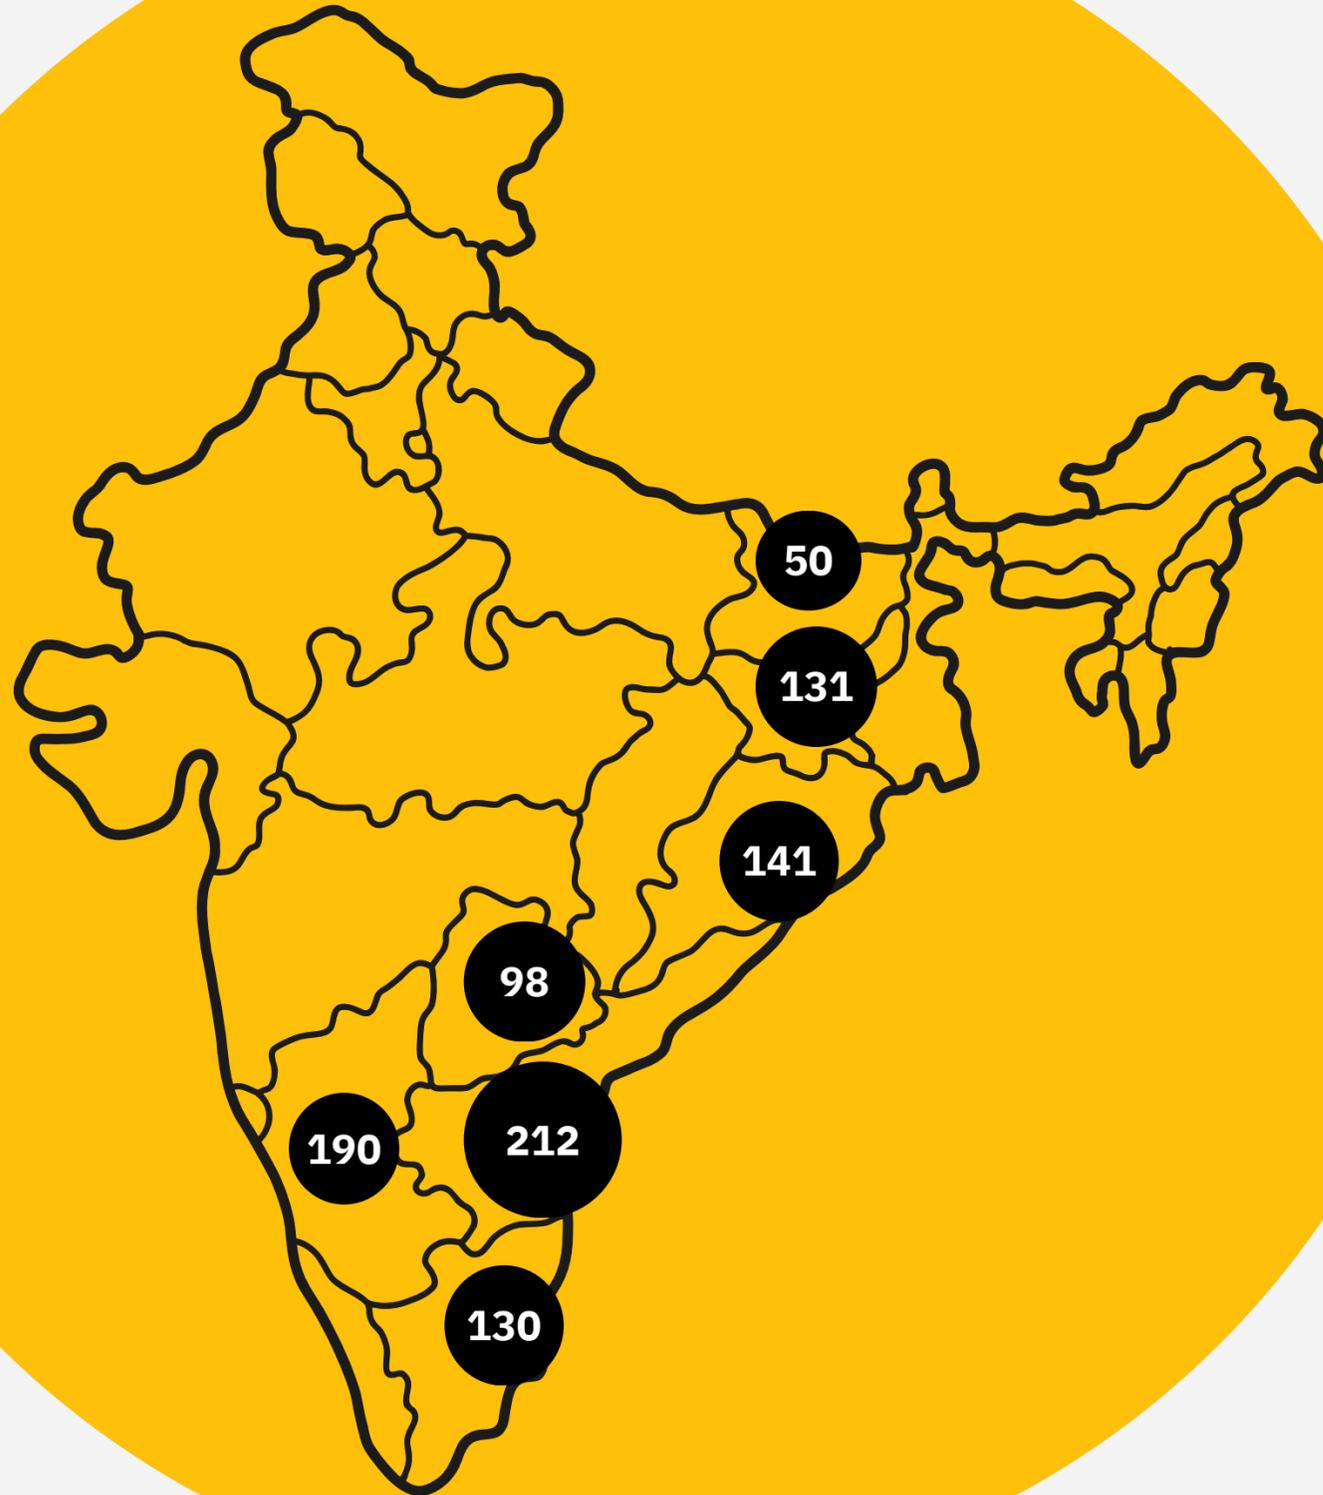

31%

of VLCs in School premises

77%

of Vidya Saathis are women

Vidya Saathis (i.e., Friends for Education) are village level resources that ILP recruits, trains and provides teaching framework

Impact of Village Learning Centers(VLC)

Grade 4

42% → 65%
